lotum

Founded in 2006, **Lotum** is one of the world's leading providers of mobile games and apps for iOS, Android, and the Facebook Messenger platform. Lotum prides itself on being a small but mighty team of just 35 people whose creations bring joy to millions of users around the world every day. When Lotum needed a database that would meet their technical requirements as well as reduce their operational costs, the team unanimously chose Couchbase.

CHALLENGES

- Enable players to switch devices without losing user profile data
- Synchronization mechanism that worked with Flutter
- Offline functionality
- Reliable support

OUTCOMES

- The ability to have user data across multiple devices
- Secure, stable, and scalable synchronization using Sync Gateway
- A flexible, highly functional, and low maintenance database

With Couchbase, we are able to provide a consistent and always-on experience for our 4.4 million monthly active users across all of their devices.

— **Lars Schmeller**
Team Lead, Lotum
